COLLAR PRIVACY FENCE

Collar privacy fence is a special fence installation method, same fence profiles for each style privacy fence.

It is widely used in Saskatchewan, Canada. It is mainly designed for some special terrain. If your local soil is relatively strong or there are many stones on the surface of the soil, it is inconvenient to dig holes, then it will be your best choice.

1 APPROPRIATE TYPES

In addition to the above, we also have a collar privacy fence, the difference is that it is suitable for F01-F04 four privacy fences at the same time.

F02

F03

F04

2 INSTALLATION DETAILS

1. First hit the steel pipe, then put on the post, and then use Collar to fix the steel pipe and the post with screws.
2. The rail and the rail need to be connected by an inner panel.

QUAIL CO PRIVACY PANEL STYLE

Our Privacy fencing is Impervious to moisture, termites and fungus. Our privacy fence panel pickets are manufactured with tongue & groove joints to ensure a smooth elegant finish. Identical on both sides ensuring our fences are pleasing for both you and your neighbors. Constructed to withstand high wind loads and work as a sound barrier with it's acoustic attributes.

Quail Co has 4 styles privacy fence for your choice. All styles available for 6ft and 8ft finished width(from post center to post center). Regular height is 6ft. All the profiles are cut into right length so that you can install the fence by hand and don't need special heavy tools.

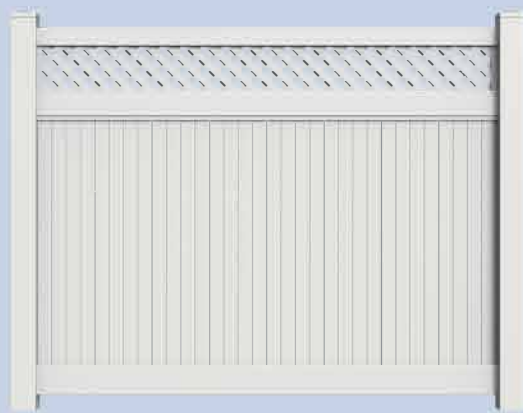

Aluminum reinforce added in the bottom rail for each style to ensure the fence will not drop and not out of shape for long time.
